Exercice Who Am I?

A bunch of java components, in full costume, are playing a party game "Who am i?" they give you a clue, and you try to guess who they are, based on what they say. assume they always tell the truth about themselves. if they happen to say something that could be true for more than one of them, choose all for whom that sentence can apply. Fill in the blanks next to the sentence with the names of one or more attendees. The first one's on us Tonight's attendees:

Class.

Method.

Object.

My instance variable values can be different from my buddy's = Object, Instance variable.

- I behave like a template = Class.

- I like to do stuff = Method.

- I can have many methods = Class, Object.

- I represent 'state' = Object, Instance variable.

- I have behaviors = Method.

- I am located in objects = Instance variable.

- I live on the heap = Object, Instance variable.

- I am used to create object instances = Class.

- My state can change = Object, Instance variable.

- I declare methods = Class.

- I can change at runtime = Object, Instance variable.
